

December 27, 2002

Mr. Jeff Belt, President
ACEN
The Construction Internet
4248 Ridge Lea, Suite 45
Amherst, NY 14226

Dear Jeff,

Although long overdue, I wish to express my compliments to you and your professional staff, in particular, Mark Griffin, for the outstanding job in developing a website for the Town of Cambria. As you know, when the Town of Cambria embarked on the venture of establishing a website, my staff researched various companies. ACEN was chosen to develop and host our website, offering us the best service within our budgetary limitations.

To my fellow public officials, I wish to express my enthusiastic support and recommendation of ACEN for their website development. We have received many compliments since the launching of the site. As an example, a building official from another county mentioned our site to a community services official who viewed it and commented, "it is terrific – a fine example of what EVERY town should have; it is laid out well, easy to use and quite informative."

Working with Mark Griffin has been a pleasure. He diligently worked with my staff to provide the best website possible for our municipality and established e-mail accounts for the various Town departments. He always made himself available to assist us whenever the need arose. I often boast that our small, rural community of approximately 5,500 residents offers our constituents what I consider to be the best website of any municipality in New York State. It certainly has provided the Town of Cambria with the precise tool needed to communicate information on our rich history, recreation programs, community organizations, public services and new developments within the Town.

Should any other municipality show interest in website development, just have them view our site at www.townofcambria.com and they will be convinced that ACEN will, without a doubt, provide the services for the best site possible.

Wishing you and your staff continued success!

Sincerely,

Lou Ann Murawski
Town Clerk
