To Acen Investors:

The Erie County Department of Public Works has embarked on a very aggressive capital construction agenda using technology as tool to improve our effectiveness and that of our consultants. We want to facilitate the exchange information with the local construction community and the industry as a whole.

Acen help has been invaluable in many different fronts, such as:

- 1) Providing on-line access to all bid documents (plans and specifications) for our three latest projects
 worth a combined total of over 60 million dollars.
- 2) Training and assisting consulting firms and reproduction companies. As well as, coordinating the production of
 final construction documents (with data coming in several formats from as many geographic locations: Salt Lake City,
 New York, Washington etc.)
- 3) Helping develop The Department of Public Works Home Page which is the repository of the above initiatives.

We are reassured by the success of our efforts and optimistic as we move forward with Acen as technologically savvy, reliable and creative partner.

Thank You.
